CRYPTOCURRENCY SCAMS: SAFEGUARD YOURSELF AGAINST THEM!

Crypto is an advanced currency with obvious benefits, such as direct peer-to-peer transactions and the opportunity for crypto-to-crypto trade on the market. Due to increasing awareness about cryptocurrency, investor interest is on the rise but so are nefarious acts by scam artists. Everything on the internet is prone to cyberattacks, and cryptocurrency is no exception, owing to its online nature. Most victims of such attacks end up in compromised situations because of errors in judgement. By being a little extra cautious, however, it is possible to avert an inadvertent error resulting in financial losses. Therefore, it is important to be aware of such malpractices and use the right safeguards against them.

DO YOUR RESEARCH about the company and people behind any crypto project before you invest in it. Be very careful in case of Initial Coin Offerings (ICOs).

BEWARE OF IMPOSTORS

Some scamming individuals are claiming to be Bitcoin/Cryptocurrency Investment experts by showing counterfeit certifications/authority letters to the users. Some scammers claim to charge tax or withdrawal fees to recover a long-lost wallet by representing themselves as Blockchain Council representatives (among other reputed organizations in this space). Blockchain Council does not offer any kind of Bitcoin/Cryptocurrency trading or investment services and we are also not associated with any Bitcoin/Cryptocurrency Investment and recovery agents.

KEEP AN EYE OUT FOR FAKE APPS

IGNORE SPAM SCAM EMAILS

DON'T GET SOCIAL ABOUT YOUR CRYPTO ASSETS

In case of any such activity observed by anyone, Blockchain Council can be reached at hello@blockchain-council.org.

Mr. Toshendra Sharma
E.D, Blockchain Council
